

Neeraj Kumar Sharma

FULL-STACK ENGINEER | HANDS-ON TECH LEAD | AI AND SAAS

ittsneeraj@gmail.com | +91 7470915225 | Bengaluru, India | itsneeraj.com | [LinkedIn](#) | [GitHub](#)

Full-stack engineer with 5+ years building AI and SaaS products across frontend, backend, data, and integrations. Hands-on in implementation, with technical leadership across architecture and delivery. Shipped platforms serving 2,000+ users and delivering 100k+ messages; reduced client support workload by 40%.

IMPACT 2,000+ users | 300+ grants refreshed daily | 100k+ messages | 40% less support workload | \$5k+/mo client savings

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: Next.js, React, Tailwind CSS, Shadcn UI

Backend and data: Node.js, Express, Django, REST APIs, webhooks, PostgreSQL, Supabase, MongoDB

AI and infrastructure: OpenAI, Claude, Gemini, RAG, LangChain, Vercel AI SDK, n8n, Docker, Vercel, Railway

Systems and leadership: Multi-tenant SaaS, AI workflows, payments, analytics, architecture, technical direction, delivery ownership

ENGINEERING EXPERIENCE

Founder and Lead Engineer | Docsiv

06/2026-Present

- Designed and built a multi-tenant AI document workspace in Next.js, TypeScript, and Supabase, spanning editors, brand kits, client portals, collaboration, analytics, signing, and credit billing.
- Own technical direction from architecture through release; launched the product and continue shipping improvements with early agency users.

Lead Engineer, AI Products | Virtual Xcellence

01/2026-Present

- Govgrant.ca: Built RAG-based grant matching for 2,000+ users and an automated pipeline refreshing 300+ grants daily, alongside authentication, subscriptions, billing, and administration.
- SpeedIQ: Led engineering delivery for a multi-tenant WhatsApp and email platform with Meta Business API onboarding, broadcasts, chatbots, live chat, and analytics; delivered 100k+ messages.
- Set technical direction across AI workflows, integrations, and platform systems while balancing delivery, data freshness, and production reliability.

Full-Stack Developer | NJ Designpark

10/2022-01/2026

- Built and shipped multi-tenant SaaS for education, trades, and service businesses, owning implementation across application, APIs, data, and deployment.
- Integrated OpenAI and Claude into production workflows, reducing client support workload by 40%.
- Delivered custom business systems, monitoring, and automation credited with saving clients more than \$5,000 per month; coordinated technical delivery with client teams.

Independent Full-Stack Developer | Freelance

2020-2022

- Delivered production web applications and payment workflows for small businesses using Django, Next.js, Node.js, Stripe, Razorpay, and PayPal.

SELECTED SYSTEMS

- **Habiv:** Built creator and player workflows, game ingestion and conversion, storage, analytics, leaderboards, and isolated game execution for a browser-first game platform.
- **Apstic:** Shipped AI automation across CRM, commerce, accounting, messaging, and browser workflows, plus a local-first assistant.

EDUCATION

B.Tech in Computer Science | Chhattisgarh Swami Vivekanand Technical University | 2020-2023
